## CAREER AND ACADEMIC ADVISING (CAC)

The CAC has advising specialists and peer advisors available to help with concerns about academic and career decisions. An excellent career library containing extensive career and college transfer information is available for student use. This center utilizes helpful computerized career decision-making assessment tests to assist in making major and career choices. Advisors help students keep on track for graduation from beginning to end. Undecided majors are called General Studies. An undecided student is encouraged to participate in a program called Undecided to Decided (U2D), or to enroll in GS 100 (Career Exploration). Career Exploration is a course designed to aid in making a decision concerning a career or a major. More information on these programs can be found at the CAC in Kimball 250. Students may declare or change majors at any of the satellite advising centers across campus.

### Faculty Mentors

Each student is assigned a faculty mentor. Students typically begin working with their faculty mentor as they approach their junior year. Mentors provide guidance in the following areas:

1. Course selection and strategy as it relates to major specific upper-division courses and minor/cluster planning
2. Graduate school guidance

Juniors and seniors should continue to work with their Satellite Advising Centers for class and graduation planning assistance.
