Job Scam Alert! Several recent postings have advertised jobs that pay employees for assisting in the transfer of funds. Beware of jobs that require you remove money from your personal financial accounts. Do not trust job postings in which someone sends you a check and has you cash it for them. Thoroughly research any company or individual that is asking you to handle money without training, experience and official documentation. Be wise. If a job sounds too good to be true, it is.

Just because a job has been listed as an "internship" in the position type field does not guarantee that a BYU-idaho student will receive internship credit if hired for the position. Internship credit is awarded only after careful review to ensure all the elements of an internship are in place, as defined by BYU-idaho.

**DESCRIPTION**

Overview: Jacobs provides field, range, testing, chemical, and biological laboratory support to the U.S. Army at the West Desert Test Center (WDTC) located at Dugway Proving Ground (DPG), UT. As a major test site for the U.S. Army Test and Evaluation Command, the WDTC is responsible for the test and evaluation of chemical and biological (CB) defense systems, incendiary and smoke/obscuration munitions systems, and related operational concepts. In addition to these responsibilities, we also support non-CB testing at the WDTC for the DOD and other Federal agencies, including environmental assessment/impact evaluation and munitions demilitarization. Our Dugway Operation was established in 2004 with the award of the Field, Range, Chamber, and Laboratory Support Services (FRC&LSS) contract to Jacobs. This operation also includes our support provided to STC through a subcontract awarded in 2006 for Test Documentation and Management Support Services for the WDTC. Through the FRC&LSS contract, we manage an integrated team of contractors that includes STC, Mellor Engineering, and Versar with a composite staff size of more than 170 personnel. Responsibilities: Perform liquid analysis using Gas Chromatography. Experience with Mass Spectrometry strongly desired. Experience with Liquid Chromatography / LCMS strongly desired. Analyze samples in accordance with the appropriate procedure. Documentation of all analysis in specified formats. Perform SST analysis using GC. Compile and review laboratory reports. Preparation of chemical solutions. Will work in the solutions laboratory half-time and serve as back-up to solutions lead. Work on individual projects within the CTD as time / necessity allows. Perform duties associated with CTD Quality Assurance program. Perform quality audits as part of CTD ISO 17025 implementation and maintenance program. May be required to work long shifts, night shifts and overtime on a rotating basis if needed. Competent with MS Office (Word, Excel, Visio) and Agilent Chemstation. Able to pass NSA background check. Able to obtain and maintain secret security clearance. This position requires US Citizenship.
