Objective
To demonstrate how to increase the total number of students in a course.

NOTE: While navigating in my.byu.edu, do not use the “back” button; always use the navigation links!

Instructions
1. If you want to increase the maximum enrollment for a class, you must call the Records and Registration office. Call x1006 to do that.
2. However, you can effectively do the same thing by authorizing more students beyond the enrollment cap.
3. For example, if the enrollment cap for a class is currently set at 30, and you want to allow 35 students in the class, just keep authorizing students to add, until you’ve reached 35.
4. To learn how to authorize a student to add a class, view the Authorization Add tutorial.
5. To learn how to reserve seats in a class for students you want to add, view the Faculty Reserve tutorial.
