*Course requires a prerequisite not built into the major. This plan includes FDMAT 110 to meet this requirement, however, other options may be available.

**Typically internships must be a minimum of 10 weeks in duration, with at least 10 hrs per week. Some departments may vary this requirement depending on the course of study. Please check with your major's internship coordinator for specific details and internship approval. Internships may be completed during any full length semester, regardless of track, and may be taken alone or with other course work. In some fields it is advisable to complete an internship after all other required coursework is complete in order to be most beneficial and aid in potential employment, if desired.

NOTE: Major elective courses are chosen from a list found in the catalog. Be aware that some major elective courses may have prerequisites which are not included in this plan.
