Awards and Participants

Each year we have about 70 students participate from 10 area high schools. In the past, participants have travelled up to 160 miles to attend.

This gives the students a great opportunity to practice their skills as they work towards the State SKILLS competition.

We try and make this a positive experience for each participant by offering awards based on individual performance in each area.

Your donations are greatly appreciated and we invite you to stop by and experience the contest first hand.

Skills Contest

We start the day off early! Many of the students travel to attend the contest. To welcome them, we provide a continental breakfast and give the students an opportunity to visit and prepare for the day.

The Exam

Everyone starts by taking a written exam which will become part of their accumulative score.

Hands-on Competition

During the hands-on portion of the competition, students participate in 10 to 12 different stations; testing their skills in each of the ASE categories.

They also test their computer skills by looking up vehicle information.

Each contestant will have a limited amount of time to perform specific tasks or diagnosis at each station.

While they rotate from station to station score sheets are gathered and tallied by BYU - Idaho students.

Lunch and Program

After each student has had an opportunity to participate at each station, we will provide lunch for them.

This year we have plans to have a motivational speaker attend to encourage and help the students to be the best they can be.
