

Family History Research

Jon Linford, Dean, Foundations and Interdisciplinary Studies

Online Degree Programs
(208) 496-9819
onlineadvising@byui.edu

Introduction

The Associate of Applied Science in Family History Research is a rigorous program designed for the student who wishes to enter the job market as a professional genealogical researcher. The degree provides a strong background in genealogical methodology, emphasizing practical research, report writing, and instruction on starting a small business. The degree will start students on the path of obtaining professional credentials through the Board of Certification of Genealogists and the International Commission for the Accreditation of Professional Genealogists. This is an online degree only.

Former CES Students

If you have at least 15 credits from a Church school (BYU, BYU-Idaho, BYU-Hawaii, LDSBC), you are able to apply to BYU-Idaho's Online Degree Program to earn the certificate or degree.

Note: These 15 credits must be earned in physical, on-campus studies, not through online or distance programs. You may also earn these 15 credits through the BYU-Idaho Pathway Program.

Apply online at www.besmart.com as an "Online Student" to earn a certificate or degree. View a step-by-step Online Degree registration guide.

All Others

You are welcome to apply as a continuing education student to take individual courses. At this time we are not able to offer an online certificate or degree to students with less than 15 CES credits earned while physically on campus.

Course Descriptions

Credits*

FHGEN 111 Introduction to Family History Research, Part One: Record Groups and Methodology (3:3:0:0)

This course is an introduction to basic genealogical research principles and record groups. Students will learn how to: Use United States records to solve basic research problems, identify original sources to answer genealogical questions, record genealogical information using professional standards, and use key record sources to identify ancestors.

(Fall, Winter, Spring)

FHGEN 112 Introduction to Family History, Part Two: Analysis of Research Evidence (3:3:0:0)

Prerequisite: FHGEN 111

This course is an introduction to genealogical evidence, analysis, and research methodology. Students will learn how to do the following: Use facts, proofs, evidence, and sources to build a case for accurate genealogical conclusions, analyze and weigh evidence to meet genealogical proof standards, cite sources using professional standards, place their ancestors in historical context

(Fall, Winter, Spring)

FHGEN 120 Internet and Computer Skills (3:3:0:0)

This course is an introduction to genealogical software, key genealogical resources on the Internet, and the computer search skills essential for genealogical research. This course does not provide instruction in how to use a computer.

(Fall, Winter, Spring)

FHGEN 130 Paleography (3:3:0:0)

This course is an introduction to paleography in early United States genealogical records. Students will learn how to do the following: Identify key genealogical record types from the Colonial era and 19th century, and read and interpret key genealogical information, including terms and phrases written in English and Latin.

(Fall, Winter, Spring)

FHGEN 140 Genealogical Writing (3:3:0:0)

Principles of effective report writing for genealogical projects, including formatting, documentation, source citations, and presentation of genealogical data. Through case studies, students will learn how to prepare effective genealogical reports for clients.

(Fall, Winter, Spring)

FHGEN 160 The Family and Society (3:3:0:0)

This course teaches (1) how families interact with the law and government as illustrated in original United States sources and (2) how these interactions produce records that help researchers discover genealogical information. Students will become familiar with the origins of and purpose for United States record sources used to answer genealogical research questions. They will learn more in-depth information about sources introduced in the first year of study. Students will add family history information to the RootsMagic software.

(Fall, Winter, Spring)

FHGEN 211 Research Methodology, Part 1 (3:3:0:0)

Prerequisites: FHGEN 111 and FHGEN 112 and FHGEN 120 and FHGEN 130 and FHGEN 140

This course teaches principles of effective genealogical research methodology. Students will plan strategies to solve research problems. They will use various types of genealogical records and sources to complete research assignments. Through assigned research projects, students will gain experience in describing a research problem, planning and executing a research strategy, compiling and analyzing evidence, assembling documents, citing sources, and producing a professional and well-organized report.

(Fall, Winter, Spring)

FHGEN 212 Research Methodology, Part 2 (3:3:0:0)

Prerequisite: FHGEN 211

This course provides further practice in effective genealogical research methodology. It is a continuation of Research Methodology, Part One. Through assigned and self-selected research projects, students will gain experience in using various records and sources to solve genealogical problems and write professional-quality research reports.

(Fall, Winter, Spring)

FHGEN 251A GSC 1: US Regions Research, Part One (3:3:0:0)

Corequisite: FHGEN 211

This course focuses on how to do genealogical research in the U.S. Regions. Through case studies and assignments, students will learn about records, including their geographical-historical background and principles of paleography. They will learn methods for reconstruction of individual families and understand the development of demographic and family history studies. Students will learn key record types for the area and how to use them to find genealogical information. Students will produce a research report on how they solved an area-specific research problem.

(Fall)

FHGEN 251B GSC 1: British Isles Research, Part One (3:3:0:0)

Corequisite: FHGEN 211

This course focuses on how to do genealogical research in the British Isles. Through case studies and assignments, students will learn about records, including their geographical-historical background and principles of paleography. They will learn methods for reconstruction of individual families and understand the development of demographic and family history studies. Students will learn key record types for the area and how to use them to find genealogical information. Students will produce a research report on how they solved an area-specific research problem.

(Fall)

FHGEN 251C GSC 1: German Research, Part One (3:3:0:0)

Corequisite: FHGEN 211

This course focuses on how to do genealogical research in Germany. Through case studies and assignments, students will learn about records, including their geographical-historical background and principles of paleography. They will learn methods for reconstruction of individual families and understand the development of demographic and family history studies. Students will learn key record types for the area and how to use them to find genealogical information. Students will produce a research report on how they solved an area-specific research problem.

(Fall)

FHGEN 251D GSC 1: Scandinavian Research, Part One (3:3:0:0)

Corequisite: FHGEN 211

This course focuses on how to do genealogical research in Scandinavia. Through case studies and assignments, students will learn about records, including their geographical-historical background and principles of paleography. They will learn methods for reconstruction of individual families and understand the development of demographic and family history studies. Students will learn key record types for the area and how to use them to find genealogical information. Students will produce a research report on how they solved an area-specific research problem.

(Fall)

FHGEN 252A GSC 2: U.S. Regions Research, Part Two (3:3:0:0)

Prerequisite: FHGEN 251A

This course focuses on how to do genealogical research in the U. S. Regions. Through case studies and assignments, students will learn about records, including their geographical-historical background and principles of paleography. They will learn methods for reconstruction of individual families and understand the development of demographic and family history studies. Students will learn key record types for the area and how to use them to find genealogical information. Students will produce a research report on how they solved an area-specific research problem.

(Winter)

FHGEN 252B GSC 2: British Isles Research, Part Two (3:3:0:0)

Prerequisite: FHGEN 251B

This course focuses on how to do genealogical research in the British Isles. Through case studies and assignments, students will learn about records, including their geographical-historical background and principles of paleography. They will learn methods for reconstruction of individual families and understand the development of demographic and family history studies. Students will learn key record types for the area and how to use them to find genealogical information. Students will produce a research report on how they solved an area-specific research problem.

(Winter)

FHGEN 252C GSC 2: German Research, Part Two (3:3:0:0)

Prerequisite: FHGEN 251C

This course focuses on how to do genealogical research in Germany. Through case studies and assignments, students will learn about records, including their geographical-historical background and principles of paleography. They will learn methods for reconstruction of individual families and understand the development of demographic and family history studies. Students will learn key record types for the area and how to use them to find genealogical information. Students will produce a research report on how they solved an area-specific research problem.

(Winter)

FHGEN 252D GSC 2: Scandinavian Research, Part Two (3:3:0:0)

Prerequisite: FHGEN 251D

This course focuses on how to do genealogical research in Scandinavia. Through case studies and assignments, students will learn about records, including their geographical-historical background and principles of paleography. They will learn methods for reconstruction of individual families and understand the development of demographic and family history studies. Students will learn key record types for the area and how to use them to find genealogical information. Students will produce a research report on how they solved an area-specific research problem.

(Winter)

FHGEN 270 Genealogy as a Business (3:3:0:0)

This course teaches students how to apply their genealogical skills to conduct paid genealogical research for clients. Students will learn how to establish and manage a research business. Students will also learn about other job opportunities for genealogists. Students will learn how genealogists conduct a successful research business. They will prepare a business plan that consists of a marketing plan that uses various media, including print and electronic. They will create a resume and learn how to conduct a successful job interview.

(Fall, Winter, Spring)

FHGEN 399 Capstone: Professional Research (3:1:0:0)

Corequisite: FHGEN 212

In this course, students will apply the skills they have gained in the Family History Applied Associates Degree program. Students will practice evidentiary analysis and writing skills in preparing different types of reports and exploring professional credentialing options in the field of genealogy. Students will learn about real-world environments by interacting with online guest speakers. Students will gain experience in completing research projects for clients. They will choose a client (fellow student, family member, or friend) and conduct research. They will prepare a well-organized client report. Students will add family history information to RootsMagic software.

(Fall, Winter, Spring)
