The Information Age has brought with it new challenges for students, researchers, and patrons of the traditional library. Because of the tremendous increase in and availability of information, it can be an overwhelming task to determine where and how to search for desired answers. One of the main purposes of the David O. McKay Library is to assist patrons in using library resources to accomplish educational pursuits and prepare for life-long learning. A variety of methods are used to accomplish this purpose. Included are orientations, one-on-one help, self-guided tours, pamphlets, instructions in using materials and databases, and a Library Research Skills Class which is offered each block.

Course Descriptions

Credits*

LR 111 Library Research Skills

(1:1:0:0)

This is an introductory course for anyone who wants to improve his or her ability to use a library more efficiently. Emphasis is placed on services available, reference materials and research techniques using the online catalog, Internet, and other electronic databases. This course is open to students of all majors, and will be particularly beneficial to anyone wanting to improve their research and information finding skills.
 (Fall, Winter, Spring)
