

CREATE A SIGNATURE BRUSH

1. Sign your name with a black marker or pen on a white piece of paper
2. Place signed piece of paper in scanner & open Photoshop to get image
 - a. File→Import
 - b. Choose Scanner
 - c. Crop as close as you can to signature
3. Save the scanned image
 - a. File→Save As
 - b. Name the file and save it as a .bmp file with default settings
4. Select signature from white background (magic wand/quick selection tools work great)
5. Create a brush
 - a. Edit→Define Brush Preset
 - b. Name the brush & click “OK”
6. Click on brush tool & make foreground color the color you want your signature
7. Select your new signature brush
 - a. Go to the down arrow next to the brushes
 - b. Scroll down and select the last brush, which is titled with the same name from step 3 above
8. Add blank layer and click once to paint your signature on the image you're working with
