

Photoshop Tips & Tricks for Beginners

Throughout the semester, those demonstrating tutorials will often use keyboard shortcuts and possibly forget to explain every little detail. Therefore, it will be helpful to review this webpage:

<http://www.photoshopsupport.com/tutorials/jennifer/tips-beginners.html>

There you will learn how to do the following and more:

- Display the same image in two windows
- Get an instant grabber hand
- Control your color squares
- Hide your palettes
- Zoom in and out
- Select just the pixels on a layer

Other sites similar to the link above can be found all over the web and contain endless amounts of time-saving keyboard shortcuts and tips/tricks. Always remember that the Internet is a key resource in learning more about Photoshop.
