

## BS in Construction Management (605)

Catalog Year  
2013 - 2014

**General Information:**

Academic Advising has provided a **recommended graduation plan** for every major we offer.

- This plan is built to meet the University's minimum credit requirement (120 credits for a bachelor's degree and 60 for an associate) in 8 semesters or less. Each plan includes all required courses, including Foundations and major as well as emphasis, minor or clusters (if applicable). The plan may also include elective courses to meet the credit requirement.
- Please note the following terms: Groups = A term used on the Degree Audit to reference a required group of classes that may be pre-selected or from which you can choose; General Elective = any course offering at BYU-Idaho which you are eligible to take; Major Elective = a required course from a list of multiple course options within your major. (A certain number of "major electives" may be required for your major, but you can select which course to choose from the given list.)

## BS in Construction Management (605) (continued)

Catalog Year

2013 - 2014

### Special Instructions

~ Construction courses may be taken any semester as long as prerequisites are met.

~ Students majoring in Construction Management are required to select either the Business Management Minor (189) or a Business Management Cluster. If a Business Management cluster is chosen, an additional cluster must be chosen from the Construction Management clusters list. Please visit the Advising Office to declare either minor or clusters by end of sophomore year.

\* Students will need to either take FDMAT 108-Mathematical Tools for the Real World (3 cr) or FDMAT 108T-Math for the Real World Test (1 cr) to complete the Quantitative Reasoning Requirement for Foundations. The prerequisite for FDMAT 108T will be the successful completion of any FDMAT course. If a student chooses the FDMAT 108T option, the CM department recommends that students majoring in CM choose FDMAT 110-College Algebra as the prerequisite for FDMAT 108T. This will better prepare students for Math 111-Trigonometry (which prepares students for Const 260-Statics and Strengths). Please see the Math homepage for more information on the Quantitative Reasoning requirement (<http://www.byui.edu/mathematics/fdmat108>).

\*\* Students are recommended to complete OPTION A under the Foundations Science Requirements.

\*\*\* Complete either FDCA 201-206 if FDCA 101 course was previously taken; or complete FDWLD 201 if FDWLD 101 was taken.

# CONST 398R - Internship recommended during off-track between sophomore and junior years.

## CONST 498R - Internship recommended during off-track between junior and senior years.

### Technical Elective (take 12 Credits from the list in the degree audit).

#### CM 460 is no longer offered but students can satisfy that requirement by completing CONST 320.
