

BS in Geology (740) Spring/Fall

Catalog Year
2013 - 2014

General Information:

Academic Advising has provided a **recommended graduation plan** for every major we offer.

- This plan is built to meet the University's minimum credit requirement (120 credits for a bachelor's degree and 60 for an associate) in 8 semesters or less. Each plan includes all required courses, including Foundations and major as well as emphasis, minor or clusters (if applicable). The plan may also include elective courses to meet the credit requirement.
- Please note the following terms: Groups = A term used on the Degree Audit to reference a required group of classes that may be pre-selected or from which you can choose; General Elective = any course offering at BYU-Idaho which you are eligible to take; Major Elective = a required course from a list of multiple course options within your major. (A certain number of "major electives" may be required for your major, but you can select which course to choose from the given list.)

Semester 1	Credits	Semester 2	Credits	Semester 3 (Fall)	Credits	Semester 4 (Spring)	Credits
GEOL 111	3	GEOL 112	3	GEOL 340	3	GEOL 352	3

BS in Geology (740) (continued)

Catalog Year

2013 - 2014

Special Instructions

~ This is only one of several different sequences that you could use. See the Geology homepage course offering sheet (<http://www.byui.edu/geology/resources/course-offerings-and-curriculum>) to see which semesters courses are offered.

* The Geology major Math requirement is FDMAT 112-Calculus and Math 215 (Multivariable Calculus). If a student took Pre-Calculus in high school (College Algebra and Trig) they may not need to take MATH 109. Students will need to either take FDMAT 108-Mathematical Tools for the Real World (3 cr) or FDMAT 108T-Math for the Real World Test (1 cr) to complete the Quantitative Reasoning requirement for Foundations. The prerequisite for FDMAT 108T is the successful completion of any FDMAT course. The Geology department recommends that Geology majors use FDMAT 112-Calculus as the prerequisite and take FDMAT 108T. Please see the Math homepage for more information on the Quantitative Reasoning requirement (<http://www.byui.edu/mathematics/fdmat108/fdmat108t-%28test-out%29>).

** It is recommended that students choose Option C to complete their Science Foundations requirement, which can be completed with FDSCI 101, CHEM 105, and 4 credits of applicable Physics courses.

*** Complete either FDCA 201-206 if FDCA 101 course was previously taken; or complete FDWLD 201 if FDWLD 101 was taken.

FDREL 333 is taught during Field Camp; it should not be taken earlier to complete a religion requirement or it will appear as a retake.

Geology electives include: BIO 180 (4 cr.), FDMAT 222 (3 cr.), GEOL 404 (3 cr.), GEOL 411 (3 cr.), GEOL 412 (3 cr.), GEOL 420 (3 cr.), GEOL 425 (3 cr.), GEOL 435 (3 cr.), GEOL 440R (3 cr.), GEOL 445 (3 cr.), GEOL 480 (3 cr.), GEOL 490R (1-2 cr.), GEOL 498R (1-3 cr.). Two spring first block Geology electives can be taken the first block of the Spring semester that you enroll in field camp.

GEOL 410 - Advanced Field Methods (Field Camp) is taught in the field and is available only during Spring semester, second block; it should be taken the last Spring semester before graduation.
