

How To Download Kurzweil

Windows - Transcript

Introduction

In this video I will be showing you how to download Kurzweil onto your Windows desktop or laptop computer. Let's get started!

Step 1 - Downloading the Program

1. Open Kurzweil Email From Disability Services

- The first step for downloading Kurzweil is to open the email from the Disability Services Office. The email should have a subject that says, "BYU-Idaho Kurzweil Personal Copy Instructions".

2. Click the Kurzweil Website Link for Windows

- Once you have the email open, if you look down in step one, there are a few links that you can choose from.
- For this video you will want to choose the "Windows Users" link.
- By clicking on this link, you will open up the Kurzweil Education website in your browser.

3. Click the Web License Link

- Near the top of the webpage there are a few links that are used to download the program. Below those links, you will see the option to download voices that can be used in Kurzweil.
- We will refer to these voices later in another tutorial.
- Now, going back to the links above, be sure to select the "Web license" link.

4. Save the Program in your Downloads Folder

- Once you click this link, a window will open up asking you where you would like to save the program download.
- I would suggest saving it in your downloads folder.
- Once you select this folder, click the Save button and the program will begin to download.

Step 2 - Browser Information

1. Downloading in Chrome

- If you are using Google Chrome, you can see the progress of your download, by looking in the bottom left hand corner of the browser window.

2. Downloading in Firefox

- If you used Firefox, you can see the progress of your download by looking in the top right hand corner of the browser window and clicking on the small arrow.
